CISM APPLICATIONS WITH CHILDREN

Traumatic events involving children disturb and confuse both the children involved and the adult responders. Our children deserve the opportunity to heal from the frightening complications of childhood trauma. This class explores the developmental considerations and children's trauma response from infancy through adolescence. Preventive, intervention and recovery strategies will assist the adult responding to traumatized children. This course will provide a venue for adults to gain comfort in their capability to assist traumatized children through a discussion of crisis management principles and the necessary modifications for children. Self-care for adult caregivers who recognize the need to heal our children is emphasized.

Adults working with traumatized children must deal with their feelings of inadequacy as they seek to assist a child in crisis. Most adults do not feel prepared to deal with the intense reactions of children. Parents, caregivers, educators, crisis management professionals and emergency service CISM peer team members can benefit from the preventive and intervention guidelines and practical crisis management strategies offered in this class.
